Election/Restrictions

1. Applicant's election of Group I, claims 1-3 in the reply filed on April 12, 2004 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Takeda Pat. No. 5,776,407.

4. Takeda discloses an injection molding apparatus including a plurality of cavities between a pair of dies which are closed under a prescribed pressure (see Fig. 1, and col. 5, lines 51-58). A control means for controlling the die closing means and injection means is disclosed at col. 5, lines 62-64. A plurality of pressure detection means for detecting the pressure in each of the plurality of cavities and controlling in response is disclosed at col. 8, lines 37-63.

Allowable Subject Matter

5. Claims 2 and 3 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 1732

6. The prior art does not teach the use of a pressure difference among the plurality of cavities and comparing the pressure difference to a prescribed value for controlling the injection means and the die closing means.
